The First 35mm Fisheye Compact Camera of the World

The Fisheye Camera by Lomographic Society International

On the lookout for a new veritable kick for our thirsty little eyes, we have once more taken a completely different approach to the subject of seeing: The Fisheye View – the Way Goldfish and Lomographers See and Live Life.

They are restless, wild and constantly on the move
They swim up close to the meat, the spirit of things
They love the wild life, partying & Rock'n'Roll
They love all living things, which is why they are also loved
(themselves being cute, obliging, amusing and entertaining entities)
And last but not least: They are deeply good, loyal, tolerant, honest and supportive creatures!

Unique ultra wide angle views on wild people & animals, bars, bath-& ball-rooms, parties, private corners, cities, countries
The camera captures an incredible amount of your field of vision (170 degrees)
Fish for exciting views and new picture styles never been captured before!
