

Take your LC-A+ 20m under the sea with the KRAB and discover the hidden depths of underwater Lomography

Based on an original LOMO design from Soviet times, the *KRAB* underwater case has been improved and specially re-created for the LC-A+. With the *KRAB* you'll be sure to take breathtaking pictures on your next adventure holiday! If you plan to go diving, skiing or just want to shoot in the next hail storm – the *KRAB* protects your Lomo LC-A+ from all kinds of camera-unfriendly situations.

The LC-A+ *KRAB* has been specially engineered for the Lomo LC-A+. With the shutter advance lever you can move your film smoothly from frame to frame. The transparent acrylic porthole transmits all the radiant colours around you and also guarantees appropriate light exposure.
